Explanation of colour coding and reported results	
X	Results for the event have not been recorded, but when recorded, the nominated team member's result for the event will be a candidate for the team score.
W	Results for the team's wildcard event have not been recorded, but when recorded, the best result of all team members for the event will be a candidate for the team score.
102.7	This team member score is one of the best 12 team member scores, and has been used to determine the team score.
W	Results for the team's wildcard event have been recorded, but this team member score did not contribute to the team score.
X	Results for this event have been recorded, but the team member registered to contribute a result for this event did not provide a result for their team.
85.9	This team member score is the lowest of the five scores for the five events registered for the team member.
89.6	This team member score would have contributed to the best 12 to make up the team score, but a wildcard event score has replaced it to improve the team score.
